# EXPERIMENT – 6

## SUBJECT NAME-ARTIFICIAL INTELLIGENCE

## TEACHER NAME-MEET KUMARI

## SUBJECT CODE- 20ECP-118_20BCS23_B

**NAME : YANA SRIVASTAVA**

**SECTION-23B**

**UID : 20BCS2279**

## Aim:

To create an artificial intelligence powered ChatBot to mimic human interactions for e-commerce.

## Requirements:

PC with internet connectivity

Steps to be followed :

1. Go to chatfuel.com .
2. Connect your facebook account to chatfuel.
3. Add your chatbot and give a name to it.
4. Now edit your chatbot using various options given there .
5. Automate the chatbot to make it responsible and working.
6. Add welcome message , default message to the chatbot.
7. Create blocks and add items that you want to sell through your e-commerce website.
8. Add url to the products , so that if someone selects the option he wants, he is redirected to the e-commerce website to buy the products.
9. Use set up AI to direct your chatbot to reply according to the responses .
10. Add blocks according to your needs .
11. Then create a fb page for your chatbot.
12. Then , connect your chatbot to your fb page through which you are selling your products or helping the e- commerce website.
